beauty in the design and detail

# Linnea

by elite office furniture (uk) limited

Linnea provides flexible space for multiple users working individually or as a team. The frame structure is strong, easy to assemble and reconfigure.

Linnea has been engineered to allow the sharing of leg components to maximise the use of workspace and minimise the financial implications.

Multi-functional dividing screens can also be included and are available in several complementary styles.

Extend your work surface by simply adding a radius end meeting point.

Mobile steel pedestals are a perfect match to Linnea's unique and distinctive leg frame detail.

Optional dividing screens offer the flexibility to increase the work surface area by accommodating monitor arm options and document filing systems.

first impressions last

strength and elegance

Cables can easily be channelled vertically from the floor to the high capacity horizontal cable tray by using either the attractive clip-on cable riser or a simple umbilical cord.

Sliding Top work surfaces provide immediate access to all cabling through a smooth, gradual curve sculptured into the work top allowing cables to pass through.

Horizontal wire management trays provide substantial capacity to accommodate cables, battery packs, phone chargers, power bars, and data blocks.

Linnea offers practical cable management capable of meeting the challenges of today's modern office.

cohesive design meets practical and modular desires

Angular workstations are a contemporary solution and provide a unique footprint that is designed to work alongside the latest I.T. technology.

Clean modern lines enable an individual's work surface to remain free and uncluttered.

create your own individual look

Attractive steel modesty panels are optional and can be added at the time of purchase or retrospectively when workstations are re-configured.

Complimentary meeting tables enable Linnea to provide the complete solution for every office environment from, managers, work grouping and reception applications.

Linnea is manufactured from a limited number of components that are fully interchangeable and flexible.

designs to accomodate the changing needs  
of today's workspaces

With Linnea it is possible to create cost effective and area efficient workspaces.

Through dynamic design and leading engineering expertise Linnea provides the most accomplished and proficient solution to its users.

Open communication is positively encouraged when classic angle combinations are planned.

In addition to the commonly specified 600mm and 800mm desk depths, 1000mm deep workstation tops are also available.

Additional work surfaces are also easily achieved by simply adding desk high pedestals with overhanging tops.

modular and flexible working environments

whatever your demands, linnea has the solution

A feature of Linnea is a seemingly floating desk top.

Architectural shapes and functions that combine with the highest workmanship to create outstanding design and quality.

## Rectangular Desk 600mm deep
